

Naturally, you know about gaskets. These rubber seals effectively separate the surface areas of PHEs as they exchange heat between two fluids, which is so vital to heating and cooling processes.

So you should know about our gaskets. If you don't, let's explain. The Plough Gasket is very probably the UK market leader. Probably because of the sheer quality and cost-effectiveness involved. Today, buying those very gaskets is very easy indeed. Simply ring **+44(0)7780 996653** or email **service@plougheng.co.uk** for the right technical advice. Just follow our instructions on specifications - model, material, size and quality - and we'll make it cost-effective for you with advice on the right gaskets. Each product has our name on it. And we're selling direct to cut prices, of course. But never cut our quality.

The leading makes and models that we supply and service include:

## GASKETS

- AGC
- Alfa Laval
- APV
- Corblin
- Fischer
- GEA
- Hisaka
- Schmidt
- Silkeborg
- Sondex
- Sorgi
- Stork
- SWEP
- Tranter
- VICARB
